

Art of Smiles Dentistry

So many factors influence the longevity of dental restorations that our best estimates are simply that, estimates. At Art of Smiles Dentistry we strive to exceed your every expectation. Optimal health is only maintainable when the doctor and patient alike commit to a joint partnership effort...

Our Commitment to Your Dental Health

*If our crowns, porcelain veneers, or onlays EVER need replacement, and the tooth is still restorable...as long as Dr. Arel maintains her private practice in dentistry...and you do your part (below) we will at no charge:

- Replace any crown with a new crown of the same type
- Replace any porcelain veneer with a new veneer
- Replace any onlay with a new onlay

Note: If a veneered or onlayed tooth is damaged or decayed to the extent that a crown is necessary, the full fee originally paid for the veneer or onlay will be applied toward the crown. You will pay only the difference. We can not predict if and/or when gum or nerve treatments may be required. If needed, they would require additional fees.

Your Commitment to Your Dental Health

- Visit our office typically 2 to 4 times per year for a professional dental cleaning and oral exam to maintain your periodontal health as determined by Dr. Arel.
- **Complete** (in our office) **all recommended treatment** in the quadrant (quarter of the mouth the tooth in question is in), all within a one year period. Gum disease and bacterial decay spread from tooth to tooth. Your path to optimal health requires a comprehensive approach to care.
- Advise us of the need to change or cancel appointments at least 48 hours in advance. Shorter notice cancellations or changes severely limit our ability to offer another patient their most preferred time.

Effective December 1, 2006

***services provided at a network negotiated fee will be guaranteed for 1 year from date of placement*
