Intended Use of the Product
This product is intended for the exclusive use for diagnoses, treatments and relative procedures of dentistry, and must be operated or handled by the qualified dentists or by dental staffs under the supervision of the dentist. Such dentists or dental staffs should instruct and/or assist the patients to approach to and leave from the product. Patients should not be allowed to operate or handle the product unless he/she is so instructed.

Environmental Requirements
Operating
Ambient Temperature 41°F ~ 104°F (5°C ~ 40°C)
Humidity 30% ~ 75%
Atmospherical Pressure 8.7psi ~ 15.4psi (600hpa ~ 1060hpa)

Storage
Ambient Temperature 14°F ~ 122°F (-10°C ~ 50°C)
Humidity 10% ~ 80%
Atmospherical Pressure 8.7psi ~ 15.4psi (600hpa ~ 1060hpa)

Classification
a. Protection against electric shock : Class I Equipment, Type B Applied Parts (Headrest, Backrest and Seat cushions)
b. Protection against water ingress : Chair (IPX0), Foot control (IPX1)
c. Equipment not suitable for use in the presence of a flammable anesthetic mixture with air or with oxygen or nitrous oxide.
d. Mode of operation : Non-continous operation. ON time : 3min. OFF time : 15 min.

⚠️ CAUTION

- This chair is intended to be used for dental examination and treatment. Do not use this for any other purpose than examination or treatment.
- Only a trained and qualified personnel should operate this chair.
- Follow all the safety precautions and instructions to protect patients and operators.
- During treatment keep small children, except for a patient, away from the treatment area.
- Always keep an eye on the patient so he/she shall not touch the equipment.
- Keep patient’s and operator’s hands, fingers or parts of the body away from moving parts of the equipment.
- In the case of defect, put a proper label on it. Call a technician of our authorized dealer.
- This product may be affected by sources that generate excessive electromagnetic waves.
- Do not install this equipment close to such devices such as elevators or communication equipment, including cellular telephones.
- Electrosurgical knives may cause the chair to temporarily malfunction. If an electrosurgical knife is to be used, turn off the main switch of the chair after the patient has been positioned.
- Take extreme care with patients that have a pacemaker. Prior to operation of the chair, ask patient to verify whether they have a pacemaker. When operating chair, be certain patient displays no indication of discomfort. Cease chair operation immediately and turn off main power switch if patient shows any sign of being affected by chair operation.
- Do not position this equipment so that it is difficult to access the main power supply outlet that the power plug of this chair is connected to.
⚠️ **CAUTION**

The followins are prohibited.
- To modify this equipment.
- To use the equipment under any failure condition.
- To use the equipment without doing the daily and periodical check-up.
- To wipe the plastic covers with any disinfectant or detergent that contains organic solvent.
- To let a person on the chair who weighs over 300 lbs.
- To let two or more person on the chair.

1. **OVERVIEW, MAJOR COMPONENTS AND SYMBOLS**

2-2 Specifications

3. OPERATIONS

3-1 Main Power Switch

1) Plug chair into 120V AC outlet
2) Turn on the main power switch located on the left side of the pump cover. A green lamp will illuminate.

⚠️ CAUTION
Operate the Main Power Switch by hand only. Turn off the main switch after daily operation. Do not touch any switch with a wet hand, as it might cause electric shock.

⚠️ NOTE
Do not touch a switch on the foot control when Main Switch is turned on.

3-2 Controls

⚠️ CAUTION

Before use
- Check connection of switches and make sure that the device functions properly.
- Make sure that grounding wire is connected.
- Make sure that cables are properly and perfectly connected.
- Be careful when you use the equipment combined with another, as it may lead to inadequate decision or danger.

Patient Entry
- Do not operate the chair until patient is fully seated. Patient head, back and feet must be in full contact with seat cushions. Patient hands must be placed on top of forward facing armrests or on their lap. All patients are at risk of potential injury if these precautions are not followed.
- Do not allow patient to sit on the hearest, armrest, backrest or the end of seat. Do not give too much load on the chair cushions. Failure to do so might lead to malfunction or an accident, such as fall from the chair or break of the device.

During use
- Do not use the chair longer than required for examination or treatment.
- Always watch the patient and the equipment to make sure nothing is wrong.
- If anything wrong is observed with the equipment or the patient, take a proper action, such as stopping the use of equipment as well as keeping the patient in safe.
- Keep an eye on the patient not to touch the equipment.
- In the case separation from any electrical pole is necessary, pull off the power plug from the power supply outlet.
- Do not touch the patient and the fuse holder simultaneously.

After use
- Turn off the switch and pull of the power supply plug.
- Clean the equipment and get it ready for use.
1) Seat Height Adjustments

a. Raise the seat by pressing foot, backrest or touchpad control (optional) indicated “Seat Raise”.

b. Lower the seat by pressing foot, backrest or touchpad control (optional) indicated “Seat Lower”.

2) Backrest Adjustments

a. Raise the seat by pressing foot, backrest or touchpad control indicated “Backrest Raise”.

b. Lower the seat by pressing foot, backrest or touchpad control indicated “Backrest Recline”.

3) Programming a Seat Position

One pre-set chair position can be stored in memory for repetitive use as follows:

a. Set backrest angle and seat height at desired position using foot, backrest or touch pad controls (optional).

b. Hold program button or switch labeled (P) until buzzer sounds (approximately 5 seconds), then release.

Chair position has been stored in the chair memory.

4) Auto Return

Chair can be returned to the patient entry/exit position by momentary pressing the button or switch labeled (A) on the foot, backrest or touchpad controls (options). The motion starts when the switch is released.

3-3 Seat Rotation, Armrest Rotation, Cancellation, Headrest adjustment

1) Armrest Rotation

Either armrest can be rotated outward by grasping lower back portion of armrest, pulling upward and turning.

⚠️ CAUTION

Do not lean on an armrest nor sit on an armrest. It could damage an armrest or could cause an injury.
2) Chair Rotation
To rotate the chair, release lock lever on right side of the chair, by pushing downward. Pull lever to lock.

3) Cancellation
a. Safety plate is provided below base link cover to stop motion of chair when object is accidentally caught underneath.
b. Automatic motion activated either by automatic return switch or preset switch, can be cancelled at any time by depressing any control switches.

4) Headrest Adjustment
a. Press down or pull up the headrest for height adjustment.
b. Grab the headrest release lever on headrest mechanism.

⚠️ CAUTION
Take care not to pinch the fingers with the headrest mechanism.

3-4 Positioning of Headrest

1. Seat patient upright and all of the way back on the chair.

2. Position the bottom of the headrest cushion so it is even with the occipital of the patient’s head.

Viewing the lower arch
1. Using the latch release button (white), pivot the headrest cushion halfway toward the patient’s head.

2. Have the patient lean back on the headrest.

3. Using the chair controls, place the patient in the desired operating position.

Viewing the upper arch
1. Lower the backrest and raise the base of the chair.

2. Slide the headrest in.

3. Support the patients head/headrest cushion while pressing latch release button.

4. Tilt the headrest cushion until the desired upper arch position is obtained.
4. CARE AND MAINTENANCE

4-1 Cleaning and disinfection

⚠️ CAUTION

Do not spray liquids directly onto chair surfaces.
In order to prevent damage to electrical components and systems, do not apply excess cleaning solution onto chair surfaces.

Routine Care
Clean plastic and upholstery surfaces regularly using a mild soap and water solution.
When cleaning, use a dampened cloth only, as excess cleaning solution can flow into the chair and cause permanent damage to electrical components.

Barrier Technique
Use of disposable barrier products should be the first choice for the protection of dental equipment. Disinfectants leave behind a surface residue that accumulates over time and eventually damages equipment and upholstery surfaces.

Chemical Disinfection
If a chemical disinfectant is to be used on chair or upholstery surfaces, contact the manufacturer of the disinfectant prior to use.
Obtain verification from the disinfectant manufacturer that their product will not damage the chair or upholstery surfaces.

Unacceptable Disinfectants
The following chemicals may damage equipment and upholstery:
* Alcohol based solutions
* Bleach
* Phenol / Alcohol combinations
* Foam spray products
* Benzalconium chloride solutions

Use with Caution
* Water based phenolic disinfectants, following manufacturer’s exact instructions for use.

⚠️ NOTE

Warranty does not cover damage to equipment and upholstery caused by disinfectant solutions.

4-2 Storage and working lifetime

4-2-1 Storage
1. Keep the equipment away from water.
2. Keep in a circumstances safe from influence by temperature, humidity, wind, sun light, air containing salts and minerals.
3. Care about stability such as inclination, vibration and impact, including handling and transportation.
4. Do not keep the equipment in a place where chemicals are or where gas is emitted.

4-2-2 Lifetime
Provided that the recommended and authorized care and maintenance are correctly performed, the working lifetime of this equipment is 10 years from the date of initial shipment from the manufacturer.
4-3 Daily Check-up of functions by the end user

The end-user is responsible for daily check-up of the equipment. In the case end user does not do this, it is allowed that you outsource it to a technician authorized by us.

In order to assure safety use of this equipment, please carry out the following check-up in a frequency as indicated below.

<table>
<thead>
<tr>
<th>No.</th>
<th>Item (Frequency)</th>
<th>How to check and diagnose</th>
<th>Influence of not doing check-up</th>
<th>Actions when any incompatibility is found</th>

<td>Call to a technician of our authorized dealer.</td>
</tr>
<tr>
<td>8</td>
<td>Power supply cable (Monthly)</td>
<td>Power supply cable should not be abnormally bent, pinched or damaged, and the plug should be firmly inserted to the power outlet and not covered with dust.</td>
<td>Accident or defect of the equipment</td>
<td>Clean and rearrange the cable. For replacement, call to a technician of our authorized dealer.</td>
</tr>
</tbody>
</table>
4-4 Guideline for Periodical Check-up

- Some parts and components of the products are degraded or deteriorated depending on the frequency of use, so yearly check-up and maintenance, as well as replacement of consumable parts, are required.
- For check-up and repair, call a technician of our authorized dealer.

4-5 Replacement of consumables

Replacement must be done by an professional technician(s) of our company or a company authorized by us.

1. Power supply cord

   1) Remove 3 M5 set screws and remove the pump cover.
   2) Remove the screws for power cable on the terminal block.
   3) Remove the cord bush from the pump cover screw plate.
   4) Take the opposite procedure to install a new power cord.

2. Cushions and upholsteries

   See the installation manual enclosed with this manual. The procedure is described in 4-2 Installation.

4-5 Disposal

- This is not an infectious device, but prior to disposal make sure that no parts of the device is infected.
- Follow the federal, state and local regulations for disposal.
NOTE

This equipment should be installed by professional technician(s) of our company or a company authorized by us. Follow the installation manual enclosed with this manual for details of installation.
