CC 401 Implant Mini-Residency

CREDITS LEVEL TUITION
16-64 ①-③ \$1295 PER TWO-DAY COURSE
\$3995 FOR ENTIRE MINI-RESIDENCY

This course provides four weekend sessions plus eight hours of home study dedicated to learning one specific DENTSPLY implant system very well.

COURSE CONTENT

- Develop a complete understanding of the surgical protocol, restorative techniques and maintenance of one single implant system – step by step.
- Gain implant treatment acceptance and treatment presentation techniques applicable to both doctors and staff.
- Create beautiful, esthetic and functional implant supported restorations.
- Manage the complexities of implant implementation with structured guidelines and a post-residency mentoring program.

COURSE SCHEDULE

SESSION 1: MARCH 6-7, 2009

Participants will experience implant challenges by reviewing case reports of single tooth replacements. Key points for case acceptance will be outlined; checklists, consultation aids, consent forms and recording forms will be provided.

SESSION 2: APRIL 17-18, 2009

This two-day seminar will concentrate on bone grafting and graduate into ridge augmentation and sinus osteotome "bumps."

SESSION 3: MAY 29-30, 2009

The fundamentals for diagnosing single tooth restorations, multiple-implant partially edentulous cases and various forms of edentulous restorations will be discussed.

SESSION 4: JUNE 12-13, 2009

This seminar will advance the understanding of how treatment planning using iCAT-guided surgical stents will enable predictable multiple implant placements.
