

After Biopsy Surgery

1. Take (3) 200mg tablets of Ibuprofen every 6 hours starting one hour after surgery.
2. If Ibuprofen is not enough take ½ tablet of Tylenol with codeine or Vicodin. Use this every 4 hours as needed.
3. Start Antibiotics the day of surgery, if prescribed, follow instructions on bottle.
4. Warm salt water rinses (3 times daily) for five days.
5. Starting the day after surgery use the prescribed oral rinse (half strength – ½ water ½ solution).
6. Nothing hot to eat or drink today.
7. Soft foods for 1 week.
