

Dr. Bhupesh Vasisht
Plastic Surgeon

Changing a Life

In his Voorhees office, Dr. Vasisht has done plenty of breast augmentations and tummy tucks, but it's his annual mission trips overseas that really stand out in his mind. Recently he repaired a cleft palate for a 6-year-old girl in the Philippines. "I got a picture of her a year and a half later," Vasisht says. "She's now back at school ... she's not called a monster anymore." Typically, Vasisht administers free treatments to more than 40 patients during each of these expeditions, and they all impact him in different ways. "These people spend their life earnings to get where we are [doing the procedures]. You are doing something that makes an impact: [in this case] changing a young girl's life."
