The preferred method for straightening teeth used to be metal train-track braces. We are please to announce that Dr. Cope is certified in Invisalign®, one of the most advanced components of adult cosmetics."

**What is Invisalign?**
It’s a proven method for straightening teeth using a series of custom-made, nearly undetectable aligners.

**How does Invisalign work?**
Each aligner is precisely calibrated and manufactured to custom-fit over your teeth and gently move them through every stage of your treatment. There are no metal wires and brackets, and you can still enjoy your favorite foods, and brush and floss easily.

**Can I benefit?**
Adults account for nearly 25% of all orthodontic patients! The most common problems are crowded teeth, teeth spaced too far apart, protruding upper or lower teeth, and upper and lower front teeth that do not touch.

**How do I get started?**
After consultation and deciding on a treatment plan, we take an impression of your teeth, and submit it to Invisalign. Using the latest 3-D computer technology, our instructions are translated into a series of medical-grade plastic aligners. You can view your own virtual treatment plan when you start, so you can see how great your straight teeth will look!

We know you’ll be inspired to consider Invisalign! Please call us for a consultation.

Porcelain Crowns

Porcelain crowns can be used on front and sometimes on back teeth that are broken or have large cavities. A crown covers the entire tooth, adding strength and protection. Full porcelain crowns look like natural teeth, do not have any dark metal edges – and give you a smile you’ll feel proud to share.

Porcelain Veneers

Enjoy the vibrant smile you’ve always dreamed of. We make exquisitely crafted and strong, porcelain veneers that can close spaces, whiten, reshape, and even straighten the appearance of your teeth. Thin porcelain facings are placed over the front of your teeth restoring natural beauty. A consultation will determine how, in as few as two visits, veneers can create your perfect smile.

Dental Implants

We do many implant procedures each month. That’s because patients are discovering that implants look very natural and feel secure, allowing them to speak clearly and eat easily. And because they help prevent bone loss, implants can help maintain a more youthful appearance. A titanium “post” can support a single replacement tooth, or a frame for several. The post will become biologically fused to the jawbone, and the replacement tooth will be secured to this post, resulting in a natural-looking smile that makes you look great!

White Fillings

If you’re feeling self-conscious and wish you could change your silver fillings, you can. When you replace silver fillings with new white fillings, called composites, you may also be removing bacterial decay that can seep under old fillings; as well as reshape chipped teeth. Composite fillings bond tightly to the tooth, providing strength and a more natural appearance. Plus, your smile will be beautifully enhanced.

Whitening

If you’ve been thinking about having a smile makeover, but you’re a little nervous about where to start – try teeth whitening. Simple and painless – whitening is a quick and affordable way to make yourself shine. Professional whitening can remove years of stains from coffee, tea, red wine, and smoking. Whether you choose take-home trays or Zoom!® same-day whitening, you’ll be amazed with your results.

JUST FOR YOU! (916) 933-9080
There’s a good possibility we’re exactly right for one another. The need to feel comfortable with, and confident in your dentist is very important. It makes visits more enjoyable, less anxiety-filled.

We care a lot about our community and are extremely proud of our reputation. Our practice was built on our patients’ referrals – they’ve chosen to trust us year after year. And should you decide that we are right for you, I can promise you that…

- You’ll have access to state-of-the-art preventive, restorative, and cosmetic dentistry.
- You’ll be treated as a friend and a valued patient.

At El Dorado Hills Dental we are committed to exceeding your expectations. Your comfort and well-being is our top priority!

We look forward to meeting you… and hopefully developing a long, mutually beneficial relationship.

Sincerely,
Dr. James C. Cope, DDS & Staff
