

AGE|LESS™ MIAMI

The Formulation

AGE|LESS MIAMI is a revolutionary anti-aging skincare system developed by Miami plastic surgeon Dr. Randy Miller. This system comes from the land of 'sea and sun' where protection from environmental factors and repair of damaged skin are simultaneous requirements for much of the Miami population.

Dr. Miller and his anti-aging team have traveled extensively throughout the Far East in search of cultural exchange with physicians practicing traditional Asian medicine. The **AGE|LESS MIAMI** formulation is a true fusion of East and West, combining ancient Asian elements with the cutting-edge ingredients of Western anti-aging technology.

Eastern ingredients include Rice and Soy Peptides, Green Tea, Ginseng, Hibiscus Extract and Seaweed Bio-Peptides. Western ingredients include Hyaluronic Acid, Coenzyme Q10 and Acetyl Hexapeptide-3.

Dr. Miller has refined this product of East-West fusion to create an anti-aging skincare system that has gained tremendous recognition and popularity among the medical community and the international patient population of Miami. Client and patient satisfaction has been remarkable.

Incorporating the latest in nanotechnology, this formulation allows for deeper penetration of active ingredients into the epidermis and dermis. Deeper transport of active molecules allows for more effective anti-aging properties, protection and repair of damaged skin.

Our unique blends are hypoallergenic and noncomedogenic. Anti-inflammatory properties help to calm and soothe the skin. The formulation is GREEN with environmentally friendly character.

A high percentage of active ingredients, minimal additives and highly certified organic components create a simplistic product that is non-diluted and highly effective.

AGE|LESS MIAMI formulas have been shown to enhance anti-aging effects with an ultra-light texture upon application to the skin.

AGE | LESS™ MIAMI

The System

The **AGE | LESS MIAMI** skin care system includes

eight components that should be used in

combination for maximum results.

Anti-Aging Cleanser contains glycolic acid and lactic acid which effectively removes facial residue and cleans pores. This deep cleansing mechanism purifies the skin and promotes natural cell turnover. Aloe and Chamomile Extracts further enhance the nutritional and purifying benefits of Green Tea. This combination provides anti-irritant, anti-inflammatory and anti-bacterial properties for cleaner and healthier looking skin. The cleansing blend of ingredients provides a foam texture which aids in removing excess oil and residue. Purification of the skin occurs without clogging pores.

Anti-Aging Toner is enriched with antioxidants and nutrients including Green Tea Extract Polyphenols, Ginseng, Cucumber Extract and Aloe Vera Extract. This combination helps to calm, soothe and revitalize skin. The astringent property of Witch Hazel balances the pH of the skin and is highly effective in minimizing pore size.

Anti-Aging Moisturizer SPF 30+ and Green Tea is an Aloe-based moisturizing formula containing Alpha Lipoic Acid and Green Tea Extract which minimize and repair skin cell damage. The combination of nanotechnology and biotechnology delivers a high UV protection. Titanium dioxide is the physical blocker included to provide UVA protection. Octinoxate is the physical blocker included to provide UVB protection. Acetyl Hexapeptide-3 minimizes the contraction of skeletal muscle and smooths the overlying skin. This is an ultra-light textured cream that is quickly absorbed upon application.

Anti-Aging Night Cream contains stabilized Retinol and other powerful ingredients that work while you sleep to create firm, smooth skin. Retinyl Palmitate stimulates cell metabolism, cell turnover and collagen production. Hyaluronic Acid hydrates to improve skin tone. Vitamin C (Ascorbic Acid) functions as a natural antioxidant to defend the cellular matrix from environmental stress and prevents premature aging. Seaweed Biopeptide extracts provide essential cellular nutrients that enhance the anti-aging process.

Anti-Aging Eye Repair Cream contains Squalene and Retinyl Palmitate which stimulate cell turnover and skin rejuvenation. These components are richly textured to create a silky soft product that is quickly absorbed in the periocular skin. Rice Bran Protein and Soy Protein Extracts minimize dark circles and reduce puffiness under the eyes. Naturally occurring Jojoba Oil and Apricot Kernel Oil are effective for the maintenance of hydration creating youthful skin. Hyaluronic Acid minimizes fine lines through its hydrophilic properties.

Anti-Aging Wrinkle Reducer works by

relaxing facial muscles. Daily application of Acetyl Hexapeptide-3 dramatically reduces the appearance of fine lines and wrinkles. Hibiscus Extract helps to strengthen collagen and elastin resulting in increased skin firmness. Plankton Extract and Sea Buckthorn are Seaweed Bio-Peptides derived from Hawaiian Red Algae. These Bio-Peptides optimize cellular nutrition.

Anti-Aging Sun Spot Fader is designed to minimize hyperpigmentation.

Bearberry Extract is used as a natural skin lightener to inhibit tyrosinase and minimize the production of darkly pigmented melanin. Squalene, a purified olive oil extract, is included as an excellent moisturizer that is highly noncomedogenic. The hydrophilic property of Hyaluronic Acid attracts and retains water, maximizing hydration. The Sun Spot Fader lightens, without bleaching, the skin. It is excellent for fading actinic keratosis also known as sun-spots or age-spots.

Anti-Aging Hand Cream SPF 30+ contains Green Tea Extract and Alpha Lipoic Acid which repair cell damage and provide essential hydration.

This unique anti-aging hand cream contains Titanium Dioxide and Octinoxate for SPF 30 UVA and UVB protection. A high concentration of Soy Peptide extract provides additional nongreasy moisturizing characteristics.

Randy B. Miller, M.D.

Dr. Miller is a board certified cosmetic and reconstructive plastic surgeon with degrees in psychology and clinical immunology,

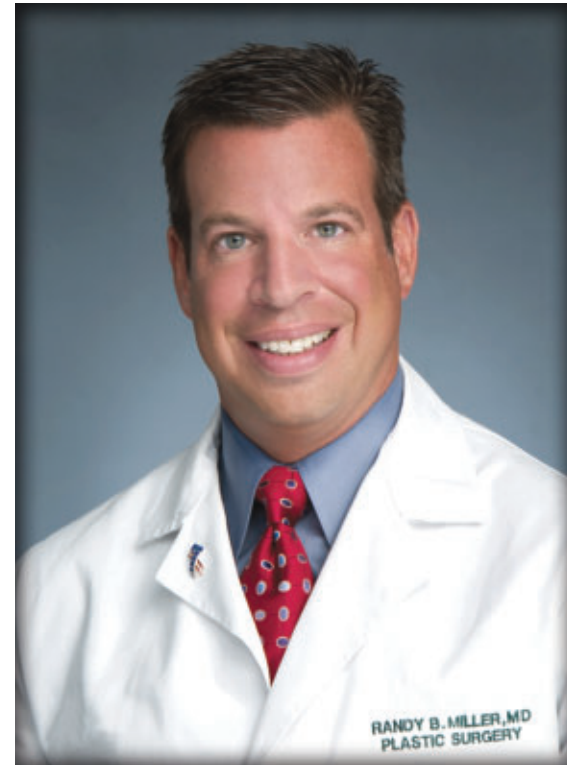

Completing medical school at Jefferson Medical College, at the top of his class, he furthered his training in general surgery and otolaryngology (head and neck surgery) at Thomas Jefferson University Hospital in Philadelphia. While completing plastic surgery training within the Texas Medical Center in Houston—the largest medical center in the world— Dr. Miller was privileged to train with numerous international experts in the fields of cosmetic surgery, microsurgery—for both cancer and trauma reconstruction, peripheral nerve surgery, hand surgery, craniofacial surgery and pediatric plastic surgery.

The recipient of academic and clinical achievement awards on national levels, he is a member of the Alpha Omega Alpha Honor Medical Society and has published and lectured extensively.

Dr. Miller is currently a faculty member in the University of Miami Division of Plastic Surgery and the Community/University liaison. He is also on the Board of Directors of the Dade County Medical Association and the Florida Society of Plastic Surgeons.

Dr. Miller is medical director of the Brickell Aesthetic Care Medi-Spa, which caters to a high-end international patient population. His plastic surgery practice and Medi-Spa experience have made him a leading authority on anti-aging skincare and the repair/prevention of environmental skin damage.

In this vast clinical setting, Dr. Miller and his team have formulated and perfected **AGE|LESS MIAMI.**
