

## **Post –Op Instructions for Root-Canal Therapy**

- If an anesthetic was used during the procedure, avoid chewing until the numbness has worn off
- Make sure to take all antibiotics(if given) for specified period of time
- It is normal to experience some discomfort for several days after procedure, especially when chewing.
- You may reduce discomfort or swelling by rinsing with warm salt water three times a day until discomfort resides. If sensitivity or discomfort persists give our office a call
- It is normal for some of the temporary filling to wash out. If all material does seem to come out give our office a call.
- Take pain medication as needed (if given)
- Brush and floss normally

If you have any questions or concerns please give our office a call at (912) 352-3955.
