Curriculum Vitae

Dr. Neal Patel is a graduate of The Ohio State University where he earned degrees in Molecular Genetics and Dentistry. Excelling in the Arts, Neal searched for a career that would allow both his artistic ability and passion for science to shine. From 2006-2007 he served as the Implant Prosthodontic Fellow and was responsible for establishing many of the techniques and protocols for Digital Implantology and Prosthetics. During his Prosthodontic Fellowship, Dr. Patel trained under world renowned Prosthodontist, Dr. Edwin McGlumphy DDS MS. Prior to opening his private practice in Powell, Neal served as a consultant educating surgeons in the field of 3D-Imaging, Computer Generated Guided Implant Surgery, and the art of stereolithography in dental applications. He is currently on an international lecture circuit speaking on Advanced Digitization in Dentistry, CBCT and its applications, and Dental Practice Management. To promote his passion for dentistry, Dr. Patel has implemented state of the art technology into an equally impressive and cutting edge facility. His perspective on 3D Cone Beam technology is refreshing, as he shows the practical applications such technology currently provides and has to offer in the future. His listeners learn how to successfully integrate CBCT into private practice, streamline clinical treatment, and generate additional sources of revenue with ease. He frequently lectures at continuing education meetings, and has published numerous clinical articles on advanced treatment techniques and procedures. He is a consultant for a number of dental manufacturers and works closely with the R & D Sector for product development and enhancement. He can be reached at drpatel@infinitemiles.com.
