

ORAL HEALTH RESOURCES

All SHL schools have the following materials which can be used for the Adopt-A-Dentist program. Please check with your adopted school for availability of the resources.

Foam Tooth Model

This detailed model illustrates the structure of the tooth. Made of resilient, non-toxic foam, the removable pieces stimulate problem-solving skills and help develop small motor skills. Comes with reproducible activity card with background information, extension ideas, and assessment tools.

Dental Care for Children Tear Pad

Designed for younger readers, this informative tear pad offers practical tips on how to keep teeth clean and healthy. Includes recommendations for brushing, flossing, healthy food choices, and dental care visits. English on one side and Spanish on the other.

Pearly Whites Dental Health Game

Teaching dental health and hygiene is fun with this board game. In one level of play, students learn types, parts, and locations of teeth. In a second level, students answer general dental health questions. Includes 100 true/false question cards, a spinner, four pawns, a game board that measures 13" x 20", and guide.

The Gross, Disgusting and Totally Cool Mouth Book

Its 40 large, perfectly photographed and reproduced images of the mouth may be "gross, disgusting and totally cool," according to a young patient, but they are unforgettable examples of real life and will influence patients dramatically.

Ready, Set, Brush!

Elmo, Zoe, and their friends from Sesame Street show kids how easy it is to care for their teeth in Ready, Set, Brush! Flaps to open, wheels to turn, and fun pop-ups help illustrate elements of oral hygiene: applying toothpaste, brushing, rinsing, and regular visits to the dentist.

Teeth Model with Toothbrush

The essentials of correct brushing techniques can be demonstrated with this giant set of teeth. Flexible hinges connect the upper and lower jaw and make teaching good oral hygiene easy.
