Course Description:
The provisional restoration may be the key to treatment success in implant dentistry. Provisional restorations are used prior to implant surgery to manage patient esthetics and function while eliminating pathology. The provisional may be used to try out the diagnostic wax up. During implant surgery, the provisional restoration aids in determining appropriate 3-dimensional implant placement and is designed to protect implant/bone healing. The provisional may also be used at this stage to guide soft tissue healing. After implant healing, the provisional restoration is used to test out tooth position, shape, phonetics, esthetics, function as well as overall comfort. The provisional can also be used to guide soft tissue or determine if prosthetic soft tissue will add or detract from the esthetic appearance of the patient. The provisional restoration can also be used to extend treatment time for financial consideration or be used as an interim long-term solution for the patient.

All of these aspects of the provisional restoration will be discussed:

- Diagnostic
- Treatment planning
- Provisional modalities - indications and design
- Transitional removable partial denture
- Essix appliance
- Fixed provisional
- Screw retained vs cementable
- Maryland bridge
- Immediate load
- Long-term provisional
- Technical implementation
- Cost analysis
- Fee schedule

Meeting Information:

- Dinner will be served at 6:00 PM
- Meeting will start promptly at 6:15 PM
- The meeting is eligible for 3 hours of New York State approved Continuing Education credit, through the Nassau County Dental Society.

Presented by:
Michael Klein, D.D.S. graduated from the University of Maryland Dental School. He went on to complete a General Practice Residency program at Woodhull Medical Center in Brooklyn, New York. Dr. Klein received his training in Oral Implantology by completing a two year, full-time Fellowship in Oral Implantology and Biomaterials at the Brookdale Hospital Medical Center in Brooklyn, New York. He then completed Specialty training in Prosthodontics at the University of Medicine and Dentistry of New Jersey. Dr. Klein is a Clinical Associate Professor at New York University in the Department of Implant Dentistry. Dr. Klein is a Diplomate of the American Board of Oral Implantology/Implant Dentistry. He has pioneered the technology used in computer-guidance for dental implant surgery and has been issued multiple patents for this technology. Dr. Klein founded Implant Logic Systems, a commercial leader in the development of technology, software and hardware for computer guided dental implant surgical procedures. Dr. Klein successfully sold the company to BioHorizons Implant Company in 2008. Dr. Klein is the Director of Advanced Implant Dentistry and Oral Restoration, in Cedarhurst, New York, where he maintains a private practice limited to Prosthodontics and Oral Implantology. He has co-authored a book, The Atlas of Oral Implantology, as well as numerous book chapters and articles on Implant Dentistry. Dr. Klein speaks nationally as well as internationally on a variety of topics in Oral Implantology.

David M. Jacobowitz, D.M.D. graduated from the University of Pennsylvania School of Dental Medicine and then completed a General Practice Residency in Beth Israel Medical Center, in New York City. Dr. Jacobowitz received his specialty training in Prosthodontics at New York University College of Dentistry, where he finished at the top of his class. He is a board-eligible Prosthodontist and an associate fellow of the American College of Prosthodontists and a Clinical Assistant Professor & former Associate Director of Full Mouth Rehabilitation, Occlusion and Gnathology in the Advanced Education Program in Prosthodontics, New York University College of Dentistry. He also taught in the Department of Comprehensive Care and in the Department of Periodontics at NYUCD. Dr. Jacobowitz is a Diplomate of the American Board of Special Care Dentistry and a fellow of the Northeastern Gnathological Society, and the American Association of Hospital Dentists. In addition to private practice with an emphasis in complex reconstruction, Dr. Jacobowitz is a dental consultant, providing on site dental care in numerous skilled nursing facilities. He has lectured along the East Coast and overseas on many topics in Prosthodontics.
