Small Diameter Implants: Indications and limitations from immediate transitional use to long term definitive prosthetics

Course Outline:

Dental implants with small diameters have been in use for many years. They are used for varying applications from immediate transitional use to long term restorative prosthetics.

Does the dimension of bone dictate its use or is it restorative parameters that indicate its appropriate use? This presentation will discuss where, why, and how to use small diameter implants as well as its limitations.

Course Objectives:

The course’s participant should be able to:

1. List the indications for use of small diameter implants.
2. Use small diameter implants for definitive prosthetics.
3. Understand the limitations of small diameter implants.

Meeting Information:

- Meetings are held on Tuesday evenings.
- Dinner begins at 7:00 PM.
- The meeting is eligible for 2 hours of New York State approved Continuing Education credit, through the Nassau County Dental Society.
- Meeting dues are $55 per evening Study Club meeting.

Compliments of:

Our group is composed of general dentists and specialists with experiences in all phases of general and specialty dentistry. We are fortunate to be able to share expertise and experience with such a collection of professionals.

We utilize a group participation format that allows us to share approaches to diagnosis and treatment planning, clinical techniques, patient management, etc.

Michael Klein, D.D.S. graduated from the University of Maryland Dental School. He went on to complete a General Practice Residency program at Woodhull Medical Center in Brooklyn, New York. Dr. Klein received his training in Oral Implantology by completing a two year, full-time Fellowship in Oral Implantology and Biomaterials at the Brookdale Hospital Medical Center in Brooklyn, New York. He then completed Specialty training in Prosthodontics at the University of Medicine and Dentistry of New Jersey. Dr. Klein is a Diplomate of the American Board of Oral Implantology/Implant Dentistry. He has pioneered the technology used in computer-guidance for dental implant surgery and has been issued multiple patents for this technology. Dr. Klein founded Implant Logic Systems, a commercial leader in the development of technology, software and hardware for computer guided dental implant surgical procedures. Dr. Klein successfully sold the company to BioHorizons Implant Company in 2008. Dr. Klein is the Director of Advanced Implant Dentistry and Oral Restoration, in Cedarhurst, New York, where he maintains a private practice limited to Prosthodontics and Oral Implantology. He has co-authored a book, The Atlas of Oral Implantology, as well as numerous book chapters and articles on Implant Dentistry. Dr. Klein speaks nationally as well as internationally on a variety of topics in Oral Implantology.

David M. Jacobowitz, D.M.D. graduated from the University of Pennsylvania School of Dental Medicine and then completed a General Practice Residency at Beth Israel Medical Center, in New York City. Dr. Jacobowitz received his specialty training in Prosthodontics at New York University College of Dentistry, where he finished at the top of his class. He is a board-eligible Prosthodontist, an Associate Fellow of the American College of Prosthodontists and a Clinical Assistant Professor & former Associate Director of Full Mouth Rehabilitation, Occlusion and Gnathology in the Advanced Education Program in Prosthodontics, New York University College of Dentistry. He also taught in the Department of Comprehensive Care and in the Department of Periodontics at NYUCD. Dr. Jacobowitz is a Diplomate of the American Board of Special Care Dentistry. He is a Fellow of the Northeastern Gnathological Society and the American Association of Hospital Dentists. In addition to private practice with an emphasis in complex reconstruction, Dr. Jacobowitz is a dental consultant, providing on-site dental care in numerous skilled nursing facilities. He has lectured along the East Coast and overseas on many topics in Prosthodontics.

We hope to see you at our next Study Club Meeting.

Drs. Klein, Jacobowitz and Staff
