

INVISALIGN FACT PACK

The Clear Alternative to Braces®

DEVELOPED WITH ORTHODONTISTS, INVISALIGN IS A VIRTUALLY INVISIBLE SOLUTION, SO YOU CAN SMILE BOTH DURING TREATMENT AND AFTER.

In fact, almost no one will know you are wearing it unless you tell. By using a series of clear, removable aligners, Invisalign straightens your teeth right before your eyes. Change them about every two weeks, and your teeth will move, little by little, toward the smile you've always wanted.

96% PATIENT SATISFACTION ¹

Over a million patients just like you are smiling more thanks to Invisalign.

Without bands, brackets or wires, the innovative technology of Invisalign treatment can help you straighten your teeth, virtually invisibly.

FREE CONSULTATION

Ask an Invisalign Preferred Provider about how Invisalign can work for you. Many Preferred Providers offer free initial consultations.

CLEAR, REMOVABLE, COMFORTABLE

Invisalign is comfortable to wear and easy to live with. You visit your doctor every month or two to check your progression and get new aligners. Average treatment time is about a year. Because the aligners are removable, you can continue to eat your favorite foods. And you can brush and floss normally to keep your teeth and gums healthy.

RESULTS YOU CAN SEE

Generalized Spacing Treatment - Nine months, 19 aligners

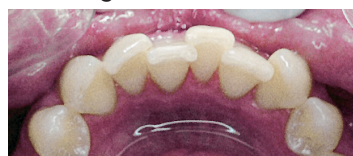

before

after

Crowding Treatment - Seven months, 14 aligners

before

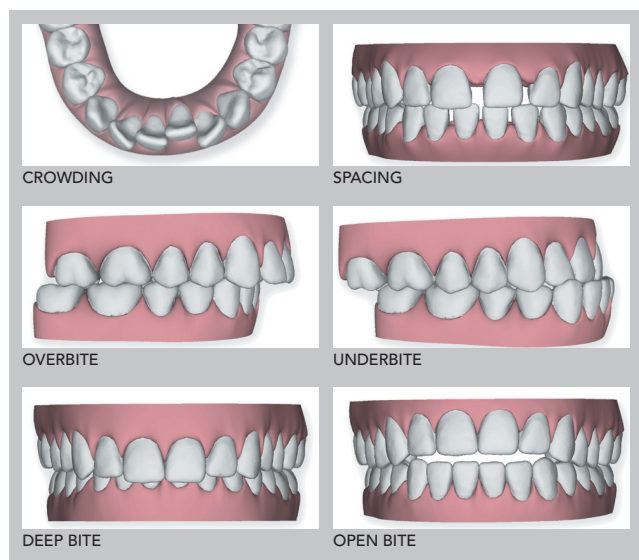

after

* Actual results may vary

Treatment Options

Not only is Invisalign versatile, helping to correct a broad range of dental and orthodontic issues, but it really works. An experienced Invisalign doctor can work with you to correct:

Hygienic Benefits of Straighter Teeth

HEALTHIER GUMS

Properly positioned teeth are easier to brush and floss than teeth that are crowded, crooked, or spaced too far apart. Properly aligned teeth can help gums fit more tightly around them, which may lead to better periodontal health. ²

EASIER CLEANINGS

With maintenance of good oral hygiene, the chances of having plaque retention, tooth decay, or periodontal (gum) disease can be reduced.

DECREASED RISK OF ABNORMAL WEAR

Properly aligned teeth can be less stressful on the supporting bone jaw joints.

Frequently Asked Questions

Q DOES INVISALIGN REALLY WORK?

A Yes. Developed with orthodontists and used in dental practices worldwide, Invisalign has been effective at straightening teeth. Over one million patients with a wide range of dental challenges have been treated with Invisalign worldwide.

Q HOW DOES INVISALIGN WORK?

A Invisalign uses 3-D computer imaging technology to map the complete treatment from start to finish. From this plan, a series of custom-made aligners unique to your treatment is produced. Each aligner is worn for about two weeks, and is then replaced by the next aligner. Gradually, the teeth move toward their final position.

Q HOW MUCH DOES INVISALIGN COST?

A Fortunately, the Invisalign system is often similar in price to traditional braces. Since each treatment is unique, treatment costs can vary from patient to patient. To determine the cost of your treatment, your doctor will consider the complexity of your case, the length of treatment, and any other treatment details that may be prescribed. The price of your treatment will be determined during your initial consultation with a trained Invisalign provider.

If your family's dental insurance includes orthodontic treatment, Invisalign may be covered. Talk to your insurance provider to determine the extent of coverage for your treatment.

Orthodontic Treatment Comparison

	Invisalign	Traditional Braces
Clear	Yes	No
Removable	Yes	No
No metal brackets	Yes	No
Able to brush and floss normally during treatment	Yes	No
