

# I use my i-CAT® for...

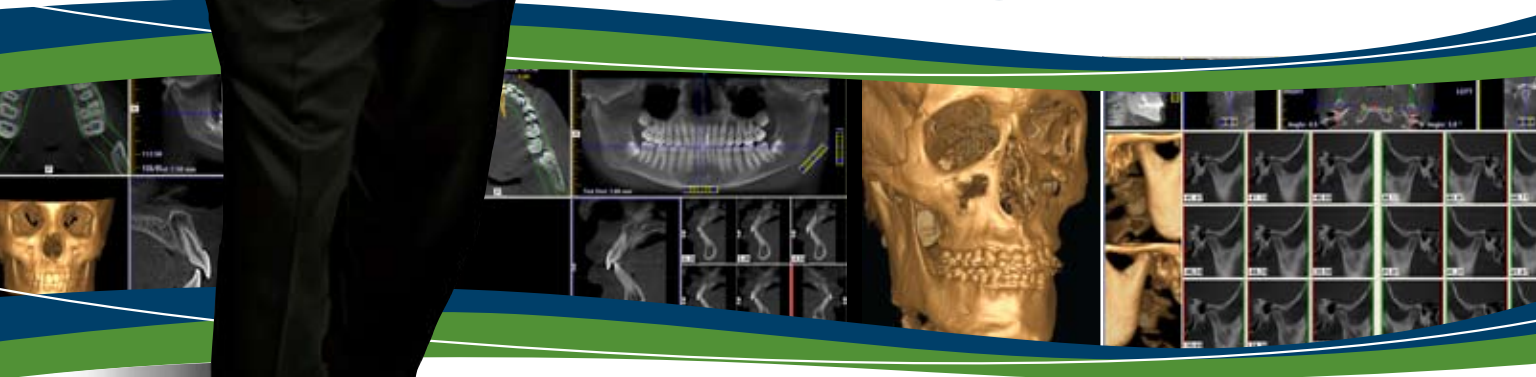

*Diagnosis and treatment planning for all my surgical cases. Especially implants, TMJ, orthognathic and challenging dento alveolar surgery.*

## The best thing about i-CAT® is...

*3-D rotational models and easy communication with my patients.*

Dr. Joel L. Rosenlicht, DMD  
Manchester, CT

The i-CAT® delivers surgical predictability through accurate, three-dimensional images of critical anatomy, pathology, bone structure, and tooth orientation to optimize implant placement and oral and maxillofacial procedures.
