### **SRS ENGINEERING RENEWS ITS GENERAL SERVICES ADMINISTRATION (GSA) CONTRACT**

#### **SRS Products are once again on the Federal Buyer's List**

Murrieta, CA – August 10, 2009– SRS Engineering Corp., is pleased to announce the renewal of its General Services Administration (GSA) contract. GSA is a service that increases the buying power of the federal government all the while leveraging tax payer dollar by getting the best price for a product or service. The GSA offers a wide range of services and products to the federal government including real estate services, travel & transport services, etc. In summation, GSA essentially provides the federal government with preferred vendors that supply anything from office supplies to a jet plane.

To enlist in the GSA program, a company must establish specific products from their product line along with special discounted pricing. The program allows the federal agencies to make rentals and purchases with minimized paperwork all the while ensuring discounted pricing. SRS' list of products cataloged with the GSA includes washing systems, solvent recovery systems, aerosol can crushing systems, and compactors.

To check out GSA products and services visit [www.gsaadvantage.gov](http://www.gsaadvantage.gov).
