CMP-Series Industrial Drum Compactor

The SRS CMP-Series are designed to crush 5 - 55 gallon drums and/or contents within a 55 gallon drum. It is also designed to compact liquid soaked materials and automatically collect the liquid in a drum.

The CMP-Series generates 40,000 - 90,000 lbs of compaction, based on the model chosen, crushing a standard 55 gallon drum to a 3 to 5 inch height.

Features and Options Include:

- EZ-Load barrel tray
- Caster Wheels
- Liquid removal system
- Explosion Resistant Package
- Key starter
- Epoxy paint
- Weather covers
- VOC and dust filter system
- Tall drum chamber
- Air filter systems
- HEPA/ULPA/Activated Carbon
- 12 x 14 guide sleeve for cylinder
- 42" stroke
- Optional Conveyors
- Auto cycle valve
- Hydraulic safety door sensor
- Heavy gauge crushing chamber
- Fork lift pockets
- 20 gallon hydraulic oil reservoir
- Electrical control box NEMA option
- 10-15 HP Motor

When other companies tell you "NO" we can't do that, SRS says "YES" we can do that.

All CMP-Series Drum Crushers/Drum Compactors are all available in Electric, Pneumatic, and Class 1 Division 1.

VersApak-Series Industrial Drum Compactor

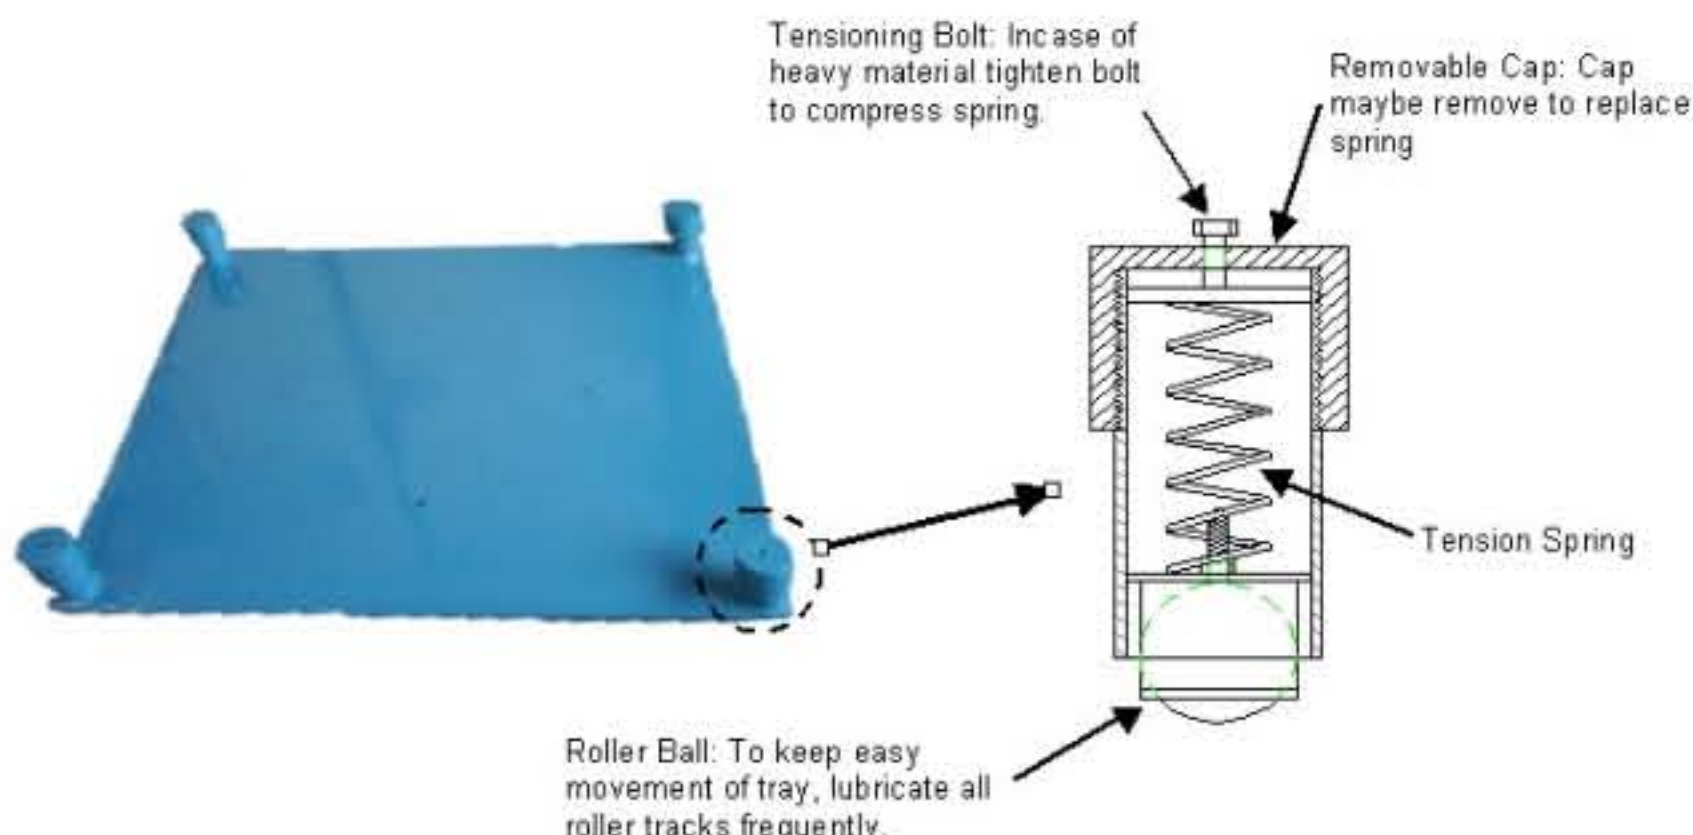

SRS has over 2 decades of experience in outstanding engineering and manufacturing

VersApak is designed to crush within 1 yard box, drum, and overpak compactor (3 Units in 1) and are equipped with interchangeable platens and a unique dual force ram system to enable multiple applications.

A single control switch delivers 20,000 lb. compacting force within cubic yard/meter boxes without damaging container & pallet. A drum setting delivers 40K-90Klb. to compact within drums or crush them.

The VersApak features a unique dual force ram system to apply 20,000 pounds of force to compact waste material in DOT approved cubic yard (meter) boxes, and a 40,000 or 90,000 pounds setting to compact or crush drums.

All of SRS compactors feature an E-Z Load Tray which allows an operator to easily move heavy filled drums in and out the compaction chamber
