

Full Arch Reconstruction

Daniel Cullum, DDS

Earl M Ness, DDS, MSD

with LIVE Surgery

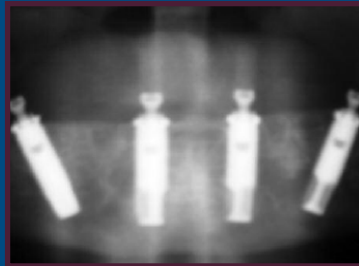

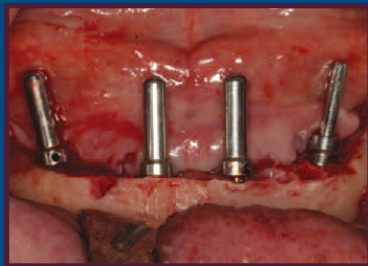

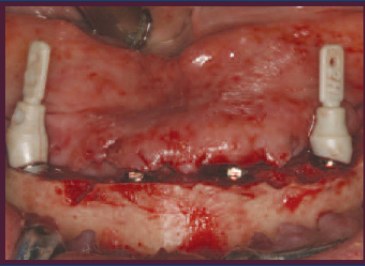

Date: TBA

Coeur d'Alene Idaho

www.implantsnorthwestlive.com

Technological advances allow us to offer patients immediate replacement of multiple teeth in dental implant therapy. To achieve predictable esthetic and functional results, a comprehensive diagnosis and treatment plan incorporating the final prosthetic design must be completed. Surgical and restorative dentists require a thorough understanding of prosthetic design, surgical site assessment, patient preparation and implant placement. Long term case presentations will demonstrate the necessary skill sets for comprehensive, immediate and minimally invasive implant reconstruction. We will discuss extraction with immediate implant/provisional restorative protocols with cross arch stabilization for full arch reconstruction with tilted and traditional four to six implant platforms. "Flapless" maxillary full arch reconstruction with CT generated/CAD surgical guides will be presented with both delayed and immediate loading. Additionally, we will review minimally invasive hard and soft tissue management/augmentation, provisional restoration and final prosthesis design.

Course Director & Speakers:

Daniel Cullum, DDS

Dr. Cullum completed his DDS with distinction at the University of Alberta, Canada and residency training at Westchester Medical Center, New York. He is a diplomat of the American Board of Oral & Maxillofacial Surgery. Dr. Cullum has had the opportunity to speak at the national meetings of the AAOMS, Academy of Osseointegration, American College of Oral & Maxillofacial Surgeons, American Academy of Prosthodontists, as well as many

state and local meetings. He has contributed a textbook chapter on implant reconstruction and served in leadership roles at both state and local societies. At Implants Northwest, he practices oral and maxillofacial surgery with an emphasis on immediate and minimally invasive techniques in esthetic implant reconstruction.

Earl M. Ness, DDS, MSD

Dr. Ness completed his DDS at Northwestern University and received his Masters of Dental Science and Certificate in Prosthodontics at the University of Washington, in periodontal and implant prosthodontics. Dr. Ness specializes in implant supported oral rehabilitation, treating functionally and aesthetically challenged patients. Dr. Ness speaks internationally as well as at state and national conferences and lectures for local study clubs. Dr. Ness

is a published author and maintains successful dental practices in Spokane and Silverdale, Washington.

Praise from Course Attendees:

"One of the most comprehensive, practical courses I've attended. Explains problems, pitfalls and "what I've learned from mistakes." Not the usual "I'm the best" scenerio so common to a majority of CE courses."

**-Dr. Robert Marks
Walnut Creek, CA**

"Honest, friendly and realistic course with valuable clinical pearls. Far more valuable than courses of the same topic offered by the implant companies."

**-Dr. Carl Young
Calgary, AB**
