

Osteotome Site Development & Trans-Alveolar Sinus Elevation with LIVE Surgery

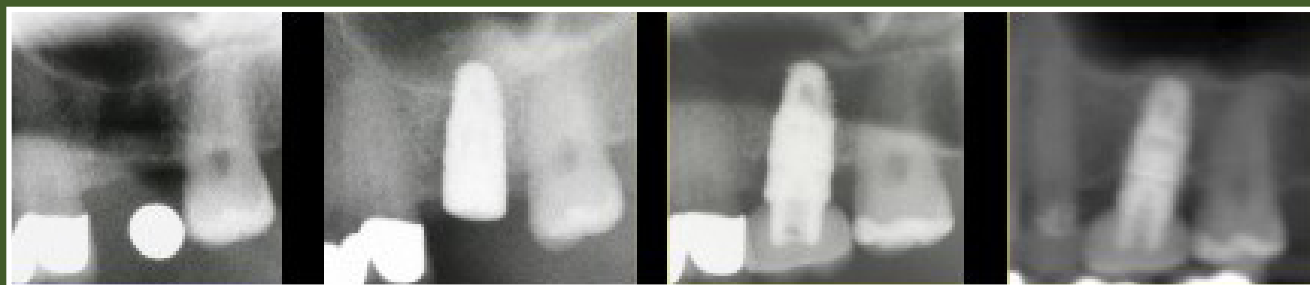

Daniel Cullum, DDS
November 12-13, 2010

Coeur d'Alene Idaho

www.implantsnorthwestlive.com

The vertically deficient posterior maxilla often requires augmentation to allow implant placement. Using live surgery and an extensive video library this course will cover osteotome techniques that offer a minimally invasive approach in moderate defects with simultaneous implant insertion. Bone manipulation can improve bone quality with condensation and modify alveolar dimensions with ridge expansion and/or sinus floor elevation. Cone Beam CT imaging is important for evaluation of alveolar dimensions and sinus anatomy for technique selection. Sinus floor elevation of 3 mm or more can be completed at single or multiple adjacent sites using several modified osteotome techniques. Sinus floor elevation can also be gained through an extraction site or at adjacent edentulous areas. Adequate attached tissue and preservation of the periosteal micro-vascular supply guide the selection of full and partial thickness flaps, micro-flaps and "flapless" techniques. We will discuss progressive skill development to avoid complications.

Course Director & Speaker:

Daniel Cullum, DDS

Dr. Cullum completed his DDS with distinction at the University of Alberta, Canada and residency training at Westchester Medical Center, New York. He is a diplomat of the American Board of Oral & Maxillofacial Surgery. Dr. Cullum has had the opportunity to speak at the national meetings of the American Association of Oral & Maxillofacial Surgeon, Academy of Osseointegration, American College of Oral & Maxillofacial Surgeons,

American Academy of Prosthodontists, Cuban Society of Maxillofacial Surgeons, as well as many state and local meetings. He has contributed a textbook chapter on implant reconstruction and served in leadership roles at both state and local societies. At Implants Northwest, he practices oral and maxillofacial surgery with an emphasis on immediate and minimally invasive techniques in esthetic implant reconstruction. Dr. Cullum is the President of Implants Northwest LIVE Learning Center. The Learning Center emphasizes training in advanced techniques for surgeon/restorative teams using LIVE surgery and hands-on application in a small group environment.

Innovative Education in Oral Reconstruction

Featuring: Advanced and Comfortable Facility, LIVE Surgery, and Hands-on Demonstrations with Breakfast and Lunch Provided

Implants Northwest LIVE Learning Center

At Implants Northwest LIVE Learning Center, our goal is to provide excellence in all we do. Our state-of-the-art facility features executive chairs, HD Video and a quality sound system, not to mention the great food. Our friendly staff is there to provide a comfortable atmosphere for learning. The live surgeries and hands-on activities make for a successful experience. Located in beautiful Coeur d'Alene, Idaho, the Learning Center is minutes away from golfing, skiing, boating and other outdoor activities. Come join us for great teaching in a wonderful facility.
