SRS ENGINEERING CORP.

PRESS RELEASE

SRS Engineering Corporation Makes the Inc Magazine's Fastest-Growing Private Company in 2009 List SRS Ranks #60 in the Top 100 Energy Industries

Murrieta, CA – June 15, 2009 – SRS Engineering Corporation, a leading Bioenergy company that offers complete solutions for engineering and manufacturing biodiesel plants made the Inc Magazine's Fastest-Growing Private Company in the year 2009 List. SRS Engineering ranked #60 out of the Top 100 in the Energy Industry and #2118 overall on the Inc 5000.

SRS Engineering experienced a 149.8 percent growth in the last four years, summing \$5.4 million revenue in the year 2008. The company credits its success to its 25 years of recognized engineering and good standing in the industry. Our reputation is backed up domestically by several Fortune 500 companies and by renowned corporations worldwide.

"We are thrilled and honored to receive this prestigious ranking", says Clayton Hawranik, CEO of SRS Engineering Corporation. "Our company has been truly devoted to designing, engineering, and manufacturing biodiesel plants and equipments that would stand out in the industry as the most energy efficient and technologically advanced in the industry. We have gathered decades of our process and engineering knowledge and poured it all into this new biodiesel industry."

Our success is driven by and is largely credited to our valued team of engineers and our dedicated staff who constantly seek advancements in our process and technologies. The biodiesel industry is constantly changing, and part of our success is due to the fact that our team not only welcomes change but strives to stay on top.

About SRS Engineering Corp.

Headquartered in Murrieta, California, SRS Engineering Corporation has been manufacturing custom process equipment for various industries for more than 20 years. The company offers a wide range of biodiesel equipment, including high-FFA pretreatment systems, high-purity methanol recovery systems, glycerin purification, continuous-flow reactors, and complete turnkey biodiesel plant solutions. SRS is uniquely positioned to deliver everything from small biodiesel plants to large-scale biodiesel refineries.
