Pacific Coast Oral, Facial and Implant Surgery Office Statement

Oral and Maxillofacial Surgical procedures are much different than procedures you may have had done at your dental office, which is why your dentist/specialist has entrusted your complex surgical needs to Dr. DeLisi. Your experience will include extensive consultation time with Dr. DeLisi to review your medical and surgical history. Treatment will be tailored to each individual and may involve collaboration with other medical, dental, or surgical specialists. You will be involved with all decision making processes.

Dr. DeLisi has extensive training in the latest anesthetic techniques including general and intravenous anesthesia. He will provide a safe, comfortable setting for your procedure. Due to the complexity of Oral and Maxillofacial Surgical procedures, IV or General Anesthesia may be administered in our office in conjunction with your treatment. On occasion, procedures may need to be conducted at a hospital or surgical center. Dr. DeLisi will determine and discuss with you which venue is most appropriate.

Please be aware that we value your time and will do everything we can to remain on schedule. Dr. DeLisi conducts in-office surgical procedures and as a community service, takes call for surgical emergencies and trauma at St. Charles Medical Center. Because emergencies are unpredictable and planned surgical procedures sometimes require additional time, we appreciate your flexibility and understanding if your appointment start time is delayed. We can guarantee that you will receive the quality care that you deserve.

We look forward to serving you!

Please sign below that you have read and understood Pacific Coast Oral, Facial and Implant Surgery’s Office Statement.
