TULSA COUNTY DENTAL SOCIETY
FRIDAY, NOVEMBER 7, 2014  7 HOURS C.E. PROGRAM
“Implants – From Placement to Restoration”
Presenter: Samuel M. Strong, DDS
Diplomate: International Congress of Oral Implantologists

This presentation illustrates why and when to offer dental implant treatment to your patients. Presurgical planning topics include implant size and type selection, site preparation, bone grafting decisions, surgical guide fabrication, and immediate fixed or removable provisionals.

Dr. Strong will also present guidelines for cement and screw retention with zirconia based restorations for single and multiple implants. Dentists’ costs, chairtime required, and the various levels of expertise depending on the type of restoration will bring a special relevance to the general practitioner. The three primary choices for full arch implant restoration (bar overdentures, unsplinted attachment overdentures, and All on Four) will also be illustrated with step by step detail.

Dr. Sam Strong provides implant prosthetic lectures and workshops for the restorative/surgical dentist and team. His unique method of cutting through the extraneous and teaching the practical aspects of implant dentistry is well established. Dr. Strong draws on his experience as an actively practicing dentist to illustrate products and procedures for fixed and removable implant restorations.

Lectures are presented with slides, videos, and animations to make the learning experience memorable with items that can be implemented quickly in the real world office. Workshops focus on training the dentist and staff on models and real-life simulations that they will typically encounter with implant cases.

Dr. Strong has published widely in Dentistry Today, Implant Dentistry, Dental Economics, Dental Products Report, and The Academy of General Dentistry’s journal, General Dentistry. He is a Diplomate in the International Congress of Implantologists and Board Credentialed member in the Academy of Dental Sleep Medicine.
