

Hi my name is Deliana and being Eastern European is not the best thing for your teeth to say the least!

I am an American now for about 14 years and that definitely changed the way I view my dental care. It is amazing still to me that people in this country have some of the best looking smiles in the world!!

I am so GLAD that I met Dr. Hoffman he completely changed the look and the health of my teeth and considerably increased my self esteem!!

Back in my country they used to pull your abscessed teeth instead of saving them so I end up having a lot of my molars missing! Thanks to Karl Hoffman I have a beautiful and healthy mouth for the first time in my adult life. Implants, crowns, and orthodontics made up for the empty spaces I had and I can once again eat without pain or discomfort!!!

I can say without any doubt that dental and oral health is very important to me as I am a very conscientious about my overall health and my mouth being in the excellent shape that is in now makes me very HAPPY! Thank you from the bottom of my heart Dr. Hoffman for all your hard work and care!!! I will say to anyone out there who is neglecting their oral health that is worth the investment of time and money because the pay out is priceless!!
