

I have been a patient of Dr. Hoffman's for many years and actually enjoy my visits to the office. I had a congenital issue that I knew was going to require not only extensive orthodontics, but several implants and surgery. I have been to many dentists and never felt comfortable enough to start down this long labor intensive path, until I met Dr. Hoffman. He had been cleaning and caring for my teeth for a few years and always discussed my future options openly. I always felt welcome and well taken care of. Dr Hoffman was always willing to slow down, distract me or fix the issues when a tooth became sensitive. I always had that feeling I was in good caring hands. His staff was equally as friendly and helpful, always happy to see me and making sure I was comfortable when I was there.

What really impressed me and made me take the leap to have Dr. Hoffman fix my smile was that he was always consulting with other doctors and staying up on the latest technology trends. I had worried for years that the technology would change so fast and I would spend thousands of dollars with a doctor who placed old technology in my mouth. I was relieved to hear of all the consultations and seminars that Dr Hoffman goes to. Over the years he would tell me had consulted my case with his colleagues in the study clubs. It was like having several experts working and looking at my case at one time! I really felt I got not only the latest technology, but the absolute best care taken with something that is so important – my smile!

Now I smile every day and catch myself looking in the mirror at my wonderful teeth. I had not realized what I was missing until now. I had quite a few missing teeth and I actually had to bite into sandwiches and tear them apart. It was not the prettiest sight, but my teeth did not meet and therefore could not break through my sandwiches. Now I am not afraid to eat anything! Dr. Hoffman not only gave me a beautiful smile, but teeth that work correctly together. I was only worrying about how my new teeth would look, but I am glad he was making sure they functioned correctly too.

I would not hesitate to recommend Dr. Hoffman to anyone, I have been with him so many years and he has taken care of my yearly cleanings as well as my long term problems that I feel I have gotten to know him and his staff as friends. For those people who just need a great dentist to take care of their teeth or maybe you need your smile changed, Dr. Hoffman is the best! Many of my appointments by their nature were uncomfortable and Dr. Hoffman had solutions to make me feel at ease. He has always been patient, understanding and willing to slow down when needed. I used to worry and get anxious about going to the dentist, but not any more, because I know that Dr. Hoffman and his staff will do whatever it takes to make me feel comfortable. Sometimes a shot is just a shot and you have to go through this, but I remember once Dr. Hoffman could see I was not looking forward to this, and he pinched my cheek and distracted me just enough to get the shot over with painlessly. It's nice to know that even adults get nervous and Dr. Hoffman is sensitive to our fears too. I guess that's the sign of a caring dentist, patients that leave with a smile.

I want to thank Dr. Hoffman for giving me back my smile and his wonderful staff for caring for me. I know I made the right choice to go with him, because he cares about his

patients, he is up on the latest technology and he is willing to go the extra mile to make you comfortable. I chose the best and it shows every time I smile!

Regards,

Ingrid
