

"I was raised on a cattle farm in Wisconsin. Unfortunately, my upbringing did not offer the benefit of regular dental care. Without parental oversight and guidance, my teeth had deteriorated excessively by the time I was a teenager. As a young adult and mother, a lack of finances caused the situation to worsen even further.

Years passed and my children eventually moved out to start their own lives. I began to pursue interests that up until that time, I had only dreamed about. I got heavily involved in health and fitness....participating in many competitive sporting events as well as ballroom dancing.

About five years ago, I started working for different health and fitness clubs in and around the Olympia area dealing with the public on a daily basis. I realized I was becoming self-conscious about the appearance of my teeth. I had always been fascinated by the beautiful smiles at the dance competitions and decided I was going to have the same for myself.

Dr. Karl Hoffman was highly recommended to me by one of my business associates. After several office visits and conversations, I decided to pursue a program which would restore the integrity of my entire mouth. The procedure took approximately three years to complete.

As a result of Dr. Hoffman's professional skills and guidance, my self-esteem and self confidence have been restored. He has made a major change in my life. I feel years younger as I get many compliments about my beautiful smile.

Thank you Doctor Hoffman!

Sincerely,

Diane
