

MAXN•FUZE™

Advanced Cellular Defense

Purpose

To provide the most effective delivery of daily nutrients, vitamins and minerals required for optimal cellular function, and to support the cell's entire anti-oxidant defense system.

General Description

Max N-Fuze was specifically designed to fuel the cell and to optimize the body's natural defense systems against free radical damage and oxidative stress. A tri-peptide found in every cell of the body called Glutathione is the body's "master anti-oxidant." However, the cell uses other anti-oxidant defense systems to relieve the burden placed on Glutathione. Max N-Fuze supports the anti-oxidants that work synergistically with Glutathione while also offering key nutrients that optimize the role and effectiveness of Glutathione. Additionally, Max N-Fuze provides a comprehensive array of vitamins and nutrients that contribute to improving overall cellular function and well-being.

All anti-oxidants are not the same. The body needs a combination of different types of anti-oxidants to defend the cell. Most consumers are familiar with "direct" anti-oxidants such as vitamin C and vitamin E that neutralize free radicals before they can harm cells. "Indirect" anti-oxidants do not neutralize free radicals directly, instead they trigger long lasting anti-oxidant activity by inducing important enzymes that help eliminate many types of free radicals. In addition to providing various direct anti-oxidants, Max N-Fuze also features powerful indirect anti-oxidants such as broccoli seed extract, green tea extract and turmeric root extract.

Since it is impossible to determine which free radicals will attack the body, and what the body's anti-oxidant needs will be on a daily basis, it is critically important to support all of the body's anti-oxidant defense systems. With Max N-Fuze, regardless of your normal daily activities, the nutrients and anti-oxidants in this formula energize and supply the body's defense systems.

Product Benefits

- Contains key vitamins and minerals required daily for optimal cellular function.
- Supports Glutathione and Glutathione enzymes in defending against oxidative stress.
- Provides key co-factors such as B vitamins, vitamin A and selenium to optimize Glutathione function.

- Offers the most highly concentrated form of sulforaphane glucosinolate from broccoli seed extract (an anti-oxidant booster and cell detoxifier) extracted using highest standards.
- Provides endogenous anti-oxidants CoQ10, and alpha lipoic acid.
- Provides indirect anti-oxidants including green tea extract (catechins) and turmeric root extract (curcumin).
- Includes vitamins and nutrients needed to support the body's network anti-oxidant defense systems including the anti-oxidant enzymes superoxide dismutase, catalase and Glutathione peroxidase.
- Supports the Glutathione Phase II detoxification pathway.

Supporting Ingredients

Green Tea Extract (catechins) - an anti-oxidant that induces gamma-glutamylcysteine ligase, the first enzymatic step in the biosynthesis of Glutathione.

Turmeric Root Extract (curcumin) - a potent anti-oxidant that fights free radicals and is known to reduce inflammation. Curcumin also induces Phase II enzymes that support the Glutathione detoxification pathway.

Broccoli Seed Extract (sulforaphane glucosinolate) - acts as a catalyst to boost anti-oxidant activity for as much as three days. It protects against DNA damaging electrophiles and helps cells neutralize toxins and carcinogens so they are eliminated quickly. It also helps to raise and replenish Glutathione levels while inducing enzymes used in Phase II detoxification.

Quercetin - a supporting flavonoid anti-oxidant that scavenges free radicals that can damage cells.

Coenzyme Q10 (CoQ10) and Alpha Lipoic Acid - endogenous anti-oxidants that are part of the body's network of anti-oxidants. They work together with Glutathione in protecting the fat and water portions of the cells from different types of free radicals.

Vitamin D - new findings reveal that the RDA (recommended daily allowance) of Vitamin D may need to be increased to fully support bone health, immunity, and other health concerns. Max N-Fuze contains 1000 IU to maximize the benefits it provides.

Vitamin A (beta carotene) and B Vitamins - co-factors that support many essential Glutathione enzymes.

Selenium - the essential catalytic component of the enzyme Glutathione peroxidase (GPx) and is required for its function.

Wound Care Consultants - for more information go to www.wound.com or call 214-237-0393

Directions for Use

Take one packet daily mixed with 8 oz. (250 ml) of water for optimal nutrition. Store in a cool dry place.

Nutritional Facts

Supplement Facts

Serving Size 1 Packet / 0.242 oz (6.9g)
Servings per container 30

	Amount / Serving	% Daily Value
Calories	10	
Total Carbohydrates	3g	1% *
Sugars	3g	†
Vitamin A (as beta carotene)	1500 IU	30%
Vitamin C (as ascorbic acid)	60 mg	100%
Vitamin D (as cholecalciferol)	1000 IU	250%
Vitamin E (as d-alpha tocopherol succinate)	30 IU	100%
Thiamine	1.5 mg	100%
Riboflavin	1.1 mg	65%
Niacin	20 mg	100%
Vitamin B6 (as pyridoxine)	5 mg	250%
Folate (as folic acid)	300 mcg	75%
Vitamin B12 (as cyanocobalamin)	50 mcg	833%
Biotin	50 mcg	17%
Pantothenic Acid (as calcium pantothenate)	10 mg	100%
Magnesium (as magnesium carbonate)	20 mg	5%
Zinc (as zinc amino chelate)	2 mg	13%
Selenium (as selenomethionine)	150 mcg	214%
Copper (as copper gluconate)	200 mcg	10%
Manganese (as manganese chelate)	200 mg	10%
Chromium (as chromium nicotinate)	30 mcg	25%

Proprietary Blend **285 mg**

† Broccoli Seed Extract (Brassica oleracea var. italica), Quercetin, Turmeric (Curcuma longa) (root extract) (95% curcumin), Green Tea Extract, (Camelia sinesis), Microencapsulated Alpha Lipoic Acid, Coenzyme Q10.

* Percent Daily Value based on a 2,000 calorie diet

† Daily Value Not Established

Other Ingredients: Fructose, citric acid, sodium bicarbonate, maltodextrin, beet root juice, stevia, natural cherry berry, natural orange flavor, lecithin and silicon dioxide.

Guarantee / Warning

This product has been manufactured in the USA in strict conformance with industry standards. Purity and potency guaranteed.

Warning: Keep out of the reach of children. This product is for adult use only. It is not intended for use by young children, pregnant women or nursing mothers. This product is not intended to diagnose, treat or prevent any disease.

Frequently Asked Questions

How is Max N-Fuze different than other multi-vitamins that I can purchase from a grocery store or vitamin shop?

Max N-Fuze is different from typical multi-vitamins in two important ways. First, it was designed not only to support the general nutritional needs of the cell (many people do not get adequate nutrition for optimal cellular performance from their diet), but also to specifically support the body's entire natural anti-oxidant defense system including Glutathione enzymes. Second, it was designed using the highest quality ingredients and delivery method for each ingredient to provide maximum absorption into the body. Many less expensive and less thoughtfully-designed multi-vitamins have poor absorption rates and are simply flushed from the body before making an impact.

Should I continue using other multi-vitamins while using Max N-Fuze?

Max N-Fuze offers a complete spectrum of vitamins, minerals and nutrients required for optimal cellular functioning and defense for most normal healthy individuals. As a result, other general use multi-vitamins can be eliminated when using Max N-Fuze. If you and/or your healthcare provider determine that there are other vitamins, minerals or nutrients that are not found in Max N-Fuze that you may need (e.g. Calcium, Omega 3 fish oils, etc.), then you should add those to your supplementation.

What other products should I take with Max N-Fuze?

It is highly recommended that you use Max One and Max N-Fuze together. Both products were designed by Dr. Herbert Nagasawa, a 40 year practicing medicinal chemist and world-renowned authority on cellular health and performance. He designed Max One and Max N-Fuze to work synergistically to provide key ingredients that optimize the body's performance while defending against the challenges of aging and disease.

Is Max N-Fuze safe for diabetics?

Always consult your healthcare provider if you have questions prior to using any Max products. However, Max N-Fuze contains just 3 grams of carbohydrates (sugars). For many diabetics, this represents a negligible amount that does not raise concerns.
