

Tissue Conditioning

First week only soak in water and use toothbrush on outside teeth only.

Test everyday and when the liner is set (which takes about 1 week) it is fine to brush them thoroughly and soak them nightly in any type of tablet or denture cleaner.

Note that red foods and red mouthwashes will stain the soft liner.

Any questions please call us at Dr. Fuesting's Office (217) 442-4267.
