Patients have a better option for their skin and dental care—Laser Clinique blends spa therapies, dental treatments and cosmetic procedures all under one roof. Treatments range from facials to Botox®, and from teeth whitening to laser hair removal.

“By providing body, skin and smile care in a spa environment, we’re making people’s lives easier,” says Dr. Alexander P. Ataii, M.D., Laser Clinique’s medical director. “Historically, medical and dental services have been segregated. What better place to combine them than in a spa setting? Your skin is just as important as your smile.”

According to Ataii, his patients appreciate receiving all of these services from one group of trusted staff. They also appreciate his hands-on involvement. “All of our patients get an individualized treatment plan,” says Ataii. “Our patients take comfort in the fact that a doctor is providing most of the treatments.”

Every aspect of the practice is revolutionary, from state-of-the-art technology to progressive treatments. One such treatment is Meso-Slim®, a technique patented by Ataii that is a painless alternative to liposuction. For pigmentation issues, Ataii offers Photodynamic Therapy treatments to remove sun damage, pre-cancerous lesions and age spots.

Another ground-breaking treatment is the ActiveFX®, a one-time, non-surgical fractional resurfacing technique that tightens skin for a rejuvenated, natural appearance with minimal downtime. “For the elimination of fine lines,

wrinkles, pigmentation and acne scarring, this is the best technology available.”

Laser Clinique’s cosmetic dentistry services are performed by Dr. Payam C. Ataii, D.M.D., dental director, and a nationally recognized laser specialist, who has been featured on ABC, NBC, CBS, and KTLA. His services

include pain-free laser dentistry, and he is recognized as the premier provider of Invisalign®, custom-made, nearly undetectable braces. He was this year’s winner of the Invisalign® Summit Convention in Las Vegas.
