LASER CLINIQUE™
Aesthetic Surgical, Medical and Dental Spa

- ActiveFX® Laser Treatments
- Photodynamic Therapy
- Lumenis One IPL® Treatments

This state-of-the-art clinic is fully equipped with the most revolutionary patented laser technology available today. These lasers treat wrinkles, sun damage, freckles, pigmentation, rosacea, age spots and sunspots. They also offer dramatic improvement in tone, texture and tightening of the skin.

Meso-Slim® is the latest, safest alternative for non-surgical body sculpting. This non-invasive treatment is the newest fat & cellulite reduction method. **LightSheer®** laser hair removal is for all skin types. This diode laser is the world's most advanced treatment for effective removal of unwanted hair. LightSheer® is appropriate for treating small areas of the face to large areas of the body both quickly and effectively for both men and women. **Juvéderm®** injectable gel, made by the makers of Botox®, is the newest dermal filler. As we age, our skin changes. Over time, the natural volume of youthful skin begins to diminish as wrinkles and folds form. Juvéderm® instantly restores the skin's volume and smooth away facial wrinkles and folds. It is very effective, particularly when used in combination with laser procedures.
