

USE IT OR LOSE IT

Did you know that you may lose \$xxx in dental insurance benefits? You may still have benefits that will be lost by the end of the year if not used!

Each year insurance companies make millions of dollars off patients who forego necessary and preventative dental treatment. Many individuals who are paying for dental insurance do not realize that their plans provide coverage up to a certain dollar amount annually.

Consequently, some patients are not scheduling the dental procedures that they need, deserve, and have insurance to cover. Thus, the insurance money available to pay dental claims on many patients is never used, and, unfortunately, those dollars cannot be carried over year-to-year. The bottom line: **What you don't use, you lose.**

We are here to help you secure the insurance coverage available to you on every dental procedure you schedule. Give our office a call at (570) 275-2684. We look forward to seeing you again and addressing your dental care needs promptly. Don't forget to visit our website, www.rinehartdentist.com, for updates!

Sincerely,
Dr. Rinehart and Staff

P.S. Find about additional zero interest financing options for dental care. Check with Patti in our office for all the details.
