He also dedicates his time to the community by spending time at the NJ Dental School as a Clinical Associate Professor in the Oral Surgery Department and is a member the Executive Committee for the State Society of Oral & Maxillofacial Surgeons.

Among the services offered are wisdom teeth removal, dental implants, bone grafting, sinus lifts, dental extractions, apico procedures, biopsies, cosmetic procedures (Restylane, Botox, Latisse), conservative TMJ

therapy, treatment for sleep apnea, and intravenous sedation for the anxious patient. Hospital procedures include maxillofacial trauma and pathology reconstruction and orthognathic (jaw repositioning) surgery.

Today, implants are a safe and painless procedure with a very high success rate. Implants can be used to replace single teeth or be used for removable denture support. Full mouth reconstruction with implant retained bridgework is also an attractive option for many patients.
