ASK DR. FUENTES

WHAT IS YOUR MOST REQUESTED PROCEDURE?

My most popular procedure is body contouring—liposuction, tummy tucks and breast augmentation.

WHAT DO YOU STRIVE TO ACHIEVE WHEN PERFORMING A PROCEDURE?

Above all, I seek to create a beautiful, natural-looking aesthetic. Patients don't want an unnatural appearance with pulls and scars. They want individually tailored, beautiful outcomes.

WHAT PROCEDURES ARE YOUR FAVORITE TO PERFORM?

I particularly enjoy facial rejuvenation. Patients see themselves in the mirror, but feel different inside. Facial surgery is so satisfying. I get to see a new and improved person coming back.

TUMMY TUCK

HOW CAN I REVIVE MY POST-PREGNANT FIGURE?

Depending on your needs, we can perform various breast and body procedures in a single surgery. For example, if you desire both larger and uplifted breasts, we can perform a breast augmentation and lift together. Or if you're concerned about a lax midsection and want larger breasts, you may be a candidate for an abdominoplasty in conjunction with breast surgery.

Prioritizing patient safety

“If you are planning an aesthetic surgery procedure, Mexico is an option to consider,” says Dr. Fuentes. However, he is just as quick to caution that patients should practice extensive due diligence when choosing a surgeon abroad. “There are brilliant board-certified doctors in Mexico who have completed stringent requirements. Many of us belong to the American Society of Plastic Surgeons and American Society for Aesthetic Plastic Surgery and attend annual meetings. We stay current with all the medical techniques, advances and training.” It is important that every prospective patient do his or her homework. “Be sure about the doctor's certification and facility accreditation. Check their referrals and study their photos. Make sure you feel comfortable and that the doctor has contingency plans in case of a complication.” According to Dr. Fuentes, surgery in an exotic locale is only a good idea if you have chosen your “guide” carefully.
