NOTES FROM DR. ANASINSKI AND STAFF

Hello Patients and Friends!

Through the years we have asked thousands of people what they feel is most important to them about their dental health. Consistently we hear the same answer: people want to keep their teeth healthy

for the rest of their lives. It is our goal to make that happen.

Unfortunately, there are some common traps that people fall into that can directly result in tooth loss or contribute to future problems with the same outcome. Prevention is our best friend when it comes to keeping our teeth and gums healthy over the years. One of the biggest traps is a common mindset that people may avoid regular dental cleanings and checkups when they lose their dental insurance or try to economize. This will only lead to further decline in your dental and overall health. It will also create a much larger and more expensive problem to treat when you're trying to cut back on costs.

Prevention is the most cost effective way to keep your teeth and gums healthy and to keep treatment needs within your budget. In addition, it has been estimated that preventative dentistry can add 10 years to your life!

We can truly help you with a personalized health plan that will make a dramatic improvement in your ability to stay healthy and keep costs manageable. To make this happen for you call us at (847) 685-6686 to schedule your appointment.

We look forward to helping you stay healthy!

Sincerely,

Dorothy Anasinski, D.D.S., Samantha Chou, D.M.D.

Michael K. Gaynor, D.D.S., M.S.

Dental Specialists of Niles, P.C.

MAKING YOUR DREAM SMILE COME TRUE!

Your smile is one of the first things people notice about you. Having a flawless, natural-looking smile boosts self-esteem, represents good health and improves your self-confidence. You will smile more, feel more outgoing and new opportunities will suddenly come your way!

- Cosmetic dentistry can give you a beautiful healthy smile. Tooth Whitening, Veneers, Crowns, and Bridges are available options for you to start creating your beautiful new smile!
- Whitening lightens teeth that are dull, stained or discolored. The best results are attained by having the whitening solution applied here in the office. It is easy, painless and takes about an hour.
- Veneers are thin, custom-made porcelain shells crafted of tooth-colored material that cover the front of the teeth. They improve the appearance of damaged, discolored, misshapen or misaligned teeth.
- Crowns are tooth-shaped "caps" that are placed over teeth. Crowns protect your teeth from further damage and help to eliminate any pain or sensitivity and allow you to eat or chew as usual.
- Bridges can restore your smile and ability to properly chew and speak. They help to maintain the shape of your face and prevent other teeth from drifting.

We can help you achieve your Smile Goals with the most advanced dental technology today. Contact us today at **(847) 685-6686** to find out what we can do for your smile!

ARE YOU A GOOD CANDIDATE FOR DENTAL IMPLANTS?

There are a number of reasons for dental implants: Fractured teeth, tooth decay, gum disease, poor fitting partial or complete dentures, trauma, or medical problems. For so long, the only treatment options offered were fixed bridges and dentures. Today, dental implants offer a better, more convenient solution, and is the standard of care.

Here are some benefits of Dental Implants:

- Fixed in place - they appear and perform like natural teeth
- Do not slip or move - there is no need for adhesive
- Preserve facial features and help to restore your natural smile
- Do no damage to your surrounding healthy teeth
- Halt the loss of bone in the area of the missing teeth
- Improve your ability to eat the foods you like without worry
- Better your appearance and your confidence
- Have long-lasting results improving your quality of life

Do you want to eat and smile with confidence?

Call us today (847) 685-6686!
