

PAN-DENTAL SURGERY

NEW TECHNOLOGIES IN DENTISTRY IN UGANDA

Some of the Pan dental staff receiving the TOP 100 mid sized companies Award 2012. L-R: Osman, Clare, Teddy, Doreen, Irene, Patrick, Sandra and Fred.

We would like to thank all our clients for your support and patronage. As our mission states; It is our mission to offer you the best, safest, comprehensive treatment in the most gentle ,comfortable manner.

With your support we have continued to pioneer various services in Dentistry in Uganda. ; Laser dentistry, computerized dentistry, injection free anaesthesia and we are in the process of installing a 3D cone beam technology. This is the first ever 3D Sirona cone beam x-ray machine in East Africa.

3.D DENTAL X RAY IMAGING.

Diagram i.i Showing Cone Beam CT 3D dental scan

With Cone beam technology in a 3 D dimension it will be easier for all dentists in Uganda to diagnose illnesses, find location of infections, cancers and see cracks in teeth which many times are not visible on 2D x-ray machines.

New light technology. We can find cavities in teeth which sometimes are not visible to the naked eye or the dental x-ray film. Siroinspect.....

NEEDLE LESS DENTAL ANAESTHESIA.

It is now possible to have anaesthesia at Pan dental surgery without injections. Almost all patients hate the dentist because of needles which are used to give anaesthesia. It is now possible to have needless anaesthesia!!!!

DENTAL HEALTH.

During this festive season we would like to remind you of dental health as a major component of your general health. Studies have shown that your general health is directly linked to your dental health. Poor dental health almost invariably implies POOR general health. For the busy person in the office who does not get the opportunity to go home for lunch an extra tooth brush in your office drawer will save you from bacterial and plaque accumulation in the mouth. That is if you use it to brush and floss your teeth after lunch!!! Studies have also shown that an electric toothbrush cleans much better than a manual one. It is definitely a worthwhile investment for your health

Pan dental surgery wishes all of you a merry X mas and a happy new year.
