

PATIENT BENEFITS

You are our first priority, and we are committed to using technology that offers you many benefits:

Superior Image Quality

One of the most evident benefits of using the best imaging technology is that the images are of the highest quality. This makes it much easier for us to see what dental issues you may be facing, and quickly and confidently make an accurate diagnosis.

Exceptional Comfort

We use the latest technology for many reasons, not the least of which is the comfort of our patients. Newer imaging systems are designed for patient comfort, and they also process images quickly so patients can spend minimal time in a given position. The open design of the **Pax-i3D Green** even allows for wheelchair accessibility.

Low X-ray Dose

Our new system also offers patients a much lower x-ray dose than other imaging equipment, reducing radiation by up to 60 percent. This helps us ensure the safety of our patients.

The New Digital Environment!

World's First
Low Dose device
that provides you
safety & low radiation

The Right Image for the Right Treatment

We want to ensure that our patients have the best care possible. By using the latest technology, we are able to review high-quality images and can quickly give our patients the right treatment.

We believe that our patients deserve the best service we can offer. That's why we invest only in the finest technology. One example of this top-quality equipment is the **Vatech PaX-i3D Green, a state-of-the-art X-ray imaging system.** This revolutionary device produces superior image quality, giving us a clear view of your particular dental issue, and allowing us to make a fast and accurate diagnosis.

The **PaX-i3D Green** is a dental imaging system that provides multiple views of a patient's mouth and jaw. Its 3D imaging creates an innovative way for us to quickly evaluate which treatments would be best for you.

Green-CT Practice
Certification

What is Green-CT?

Low X-ray radiation: Providing safer CT scans with the latest advances in X-ray technology.

FDA cleared for pediatric use: Child sized X-ray doses, minimizing danger to our children.

Eco-friendly device: Safer materials and less impact on the environment.

Certified by Vatech

We want you to be relaxed throughout the diagnostic process and the treatment phase. We are confident that this superior technology will keep our patients safer and more comfortable. It allows us to provide a fast and accurate diagnosis – and better dental care.

Ask us for more details on the PaX-i3D Green or any of our advanced equipment.
