

“For years I put off having extensive work done on my teeth. I was in the habit of smiling with my mouth closed. After consulting with Dr. Pominville, he showed me what he would be able to do with my front teeth, and outlined what each step would cost. Dr. Pominville pays attention to detail, and took the time to make sure everything looked and felt right to me. His competent staff helped set me up with a payment plan that worked well for me.

I enjoy smiling now and have received very positive comments from my family and friends. Now I think “Its okay to smile showing your teeth, Joyce!” because they look so great! Its one of those things that goes a long way in raising self-confidence. Here I am – in my mid-50’s- and I’m so glad I made this decision!” – Joyce
