

Frequently Asked Questions

Is teeth whitening safe?

Yes. Research has shown that when teeth are normal and healthy there are no apparent adverse effects on the tooth's enamel.

What causes tooth discoloration?

Eating and drinking dark pigmented foods and beverages such as coffee, tea, cola and red wine along with aging and smoking are the leading causes of tooth discoloration.

Are there any side effects?

Only a small percentage of people may experience a slight tingling sensation during treatment. This subsides once the teeth are rinsed.

Does teeth whitening work for everyone?

Teeth whitening is not effective on individuals with stained teeth as a result of certain medications, decalcification, or those who were born with grayish teeth. It is not recommended for pregnant or nursing women, or children under 14.

Will teeth whitening affect my dental work?

This process will not whiten crowns, fillings, veneers or other dental work. The process does not adversely affect these structures.

Each Sinsational Smile treatment donates a portion of its proceeds to these charities.

Surfrider Foundation.

We are the 1st and only Green Certified teeth whitening company in the world.

Teeth whitening in only 20 minutes!

Fast, easy, comfortable and affordable.

Now you can have the bright smile you've always wanted.

Give your smile a boost.

A beautiful smile is an important asset.

Not only do white teeth enhance your smile, but they make you feel more confident about your appearance. You deserve to have a beautiful and exceptional smile. We can help you achieve a whiter smile and a more confident you, in just 20 minutes.

The Sinsational Smile whitening method.

Sinsational Smile uses a fast and effective technology with our patented pre-filled silicone tray. This allows the jaw to remain relaxed and the patient comfortable throughout the 20 minute treatment. This procedure includes the use of an LED accelerating light that helps to activate the gel's whitening ingredients at a faster rate, resulting in a brighter smile and whiter teeth in less time. As part of your procedure, you will also receive a take-home maintenance pen to further extend your new brighter smile!

How many treatments will you need?

The number of treatments necessary will vary based on your need and color preference. On-going whitening treatments are recommended on a scheduled basis to maintain and rejuvenate your smile. Though most people will notice a big difference after only one treatment, additional treatments may be necessary to achieve the sparkling white teeth you desire.

How long will the results last?

Whitening durations vary from person to person. Certain food and drinks as well as other factors (i.e. tobacco, medications, age) can all affect the longevity of your results, especially if between visits you continue to use the maintenance pen. This easy to use pen can be used anywhere and takes only a couple of minutes to help you keep your teeth looking their whitest.

It's best to have your teeth whitened immediately after your teeth have been professionally cleaned!

Look younger.

Who should consider teeth whitening?

Most people are good candidates for teeth whitening and do see substantial improvements in their teeth, even after one treatment. All whitening procedures work best on natural, healthy teeth and should not be used by people with poor oral health or anyone advised by their dentist not to have their teeth whitened.
