

LANAP® Laser Assisted New Attachment Procedure

LANAP — is truly one of the most revolutionary developments in Gum Treatment. A minimally invasive laser therapy for the treatment of periodontal disease, LANAP is a proven alternative to some of the more traditional surgical procedures associated with periodontal therapy.

Dr. Browar is trained to provide this new treatment approach to help patients achieve improved oral health and a more esthetic smile.

WHAT ARE THE BENEFITS OF LANAP THERAPY?

As with other forms of periodontal therapy, a main goal of LANAP is to treat diseased gum and bone tissue and to stimulate regeneration of attachment between the gums, bone and teeth. During treatment the laser causes instant clotting in the gum tissue that actually works to seal the gums and create a physical barrier to any new bacteria that might invade the gums during the initial healing period. . LANAP therapy has also been shown to heal with less tissue shrinkage compared

to traditional periodontal treatment, thus improving esthetics.

Many medical compromised patients who cannot have traditional surgery can have LANAP. For our patients who are candidates for LANAP therapy, other welcome benefits include less painful treatment without scalpel cutting or stitches, less risk of infection, shorter appointment times, and an easier recovery compared to traditional flap surgery.

WHAT SHOULD I EXPECT DURING AND AFTER LANAP TREATMENT?

Before your LANAP treatment you will be given a local anesthetic to insure your comfort. During the procedure a tiny laser fiber (about the thickness of three hairs) is inserted between the tooth and the gum to clear away infection. The roots are thoroughly cleaned and a second laser application triggers an immediate healing response in the tissue. Your bite will be checked for any disharmonies.

You'll most likely feel well enough to go right back to work the next day.

“Periodontal Surgery without the surgery”

- No Scalpel
- No Stitches

DR. ANDREW BROWAR

I am a licensed periodontal specialist in Hinsdale, IL for over 30 years, and a licensed LANAP® provider.

I have dedicated my professional career to helping people keep their teeth in health and function. This is particularly important as we understand just how oral health can affect general health.

Let me show you how you can have a healthier smile and better health.

Call us and ask if you are a candidate!
