

What we have learned are the needs of the patient with severe dental care phobia:

- Reassurance that they can be helped
- They just want to get the work done
- Deal with anxiety to just get into the office
- To feel confident with their dental team
- Not be embarrassed
- Pain free dentistry
- Anxiety free experience
- Safe environment
- Financial options
- A rapid solution
- A permanent solution

Why we are good at this:

- 36 years of experience handling patients who are referred by other dentists
- Able to handle many different clinical situations in single settings
- Safe anesthesiologist doing the IV sedation while the dentist attends to the dental care
- A competent team
