

## Naren Rajan, DMD

### • *General Dentistry*

It's no surprise that patients are relaxed and comfortable under Dr. Naren Rajan's care. His easy-going style helps them smile with confidence, both in and out of his dental chair. He says, "I connect with patients and put them at ease, making their visit more pleasant and relaxing than they expected."

Utilizing painless single tooth anesthesia, a digital scanner for easy impressions, and other new patient-friendly technologies,

Dr. Rajan offers a full range of services. More people with multiple failing teeth are requesting All-on-4® procedures and leaving with fixed bridges in one day instead of dentures. He is also treating more patients with previously undiagnosed sleep apnea, where a custom oral appliance often successfully cures mild to moderate cases. "Our patients become excited about what we can do for them," he says.

A UMDNJ graduate with Omicron Kappa Upsilon honors, he regularly attends the respected Spear Institute in Arizona to study advanced restorative techniques. He also lectures nationally about digital techniques in dentistry. "We've built this practice one patient at a time," says Dr. Rajan, who attributes his success to his friendly and devoted staff. Dr. Rajan is a seven-year *New Jersey Monthly* Top Dentist.
