USC Dental School, 1978

Awards & Accolades:
Past part-time instructor at USC School of Dentistry

Services Offered:
Dental exams and cleaning, dental X-rays, cosmetic dentistry, periodontal disease diagnosis, tooth-colored resin and ceramic restorations, complete dentures and partial dentures, dental implant-supported restorations, root canals, tooth-supported crown and bridge restorations, decay prevention program (CAMBRA)

RECOMMENDED

Dr. Warren highly recommends WOW Powder Oral Rinse. This product represents a whole category in oral care/home care/ plaque control. It is an absorbent (amorphous silicon dioxide)

combined with a bactericidal agent (bicarbonate ion) that gives the chemical ability to successfully strip/remove the bio-film from the tooth surfaces and kill the pathologic anaerobes that cause disease. Patients will love this product because of the fresh, clean taste. Continuous use will result in positive improvements and the reduction of the most important risk factors for long-term health.

OFF THE CLOCK WITH DR. WARREN

Dr. Warren (as he is called by his patients and dental team) was born and raised in the South Bay. Most recently he was an assistant freshman/sophomore girls' basketball coach at Peninsula High School, and he still enjoys playing competitive basketball. Other hobbies include U.S. Masters swimming, fishing, snowboarding and traveling the globe with his wife and two daughters. Community service has always been an interest for Dr. Warren. Each year he participates in the California Dental Association's CDA Cares program, providing dental services to the underserved, disabled and low-income community of California.

BEFORE & AFTER

We are a dental practice devoted to restoring and enhancing the natural beauty of your smile. We love to see our patients happy and smiling following dental treatment. Cosmetic services are one way that we can change your life and improve your face value. (These two photographs show before-and-after views of one of our patients. She was extremely pleased with her new smile after we restored her four front upper front teeth.)

My staff members are the best group of oral health care enthusiasts in the world."

TELL US ABOUT YOUR BACKGROUND.

"I have been in the dental practice for 35 years, and I have loved every minute of it. Right after graduating from USC, I was fortunate to begin my career with the established father/son team of Dr. Stan Yanase and Dr. Roy Yanase. Both of these knowledgeable and compassionate dentists have mentored me through the years."

WHAT'S ONE TREND THAT IS CHANGING YOUR SPECIALTY TODAY?

"I have always believed in the concept of prevention. Today, with scientific research and the knowledge gained from evidence-based studies, we have products available that can help eradicate tooth decay. Wouldn't that be wonderful? No more pain from cavities."

TELL US ABOUT THE STAFF AT YOUR PRACTICE.

"My team is truly dedicated and committed to excellence. We strive to provide the highest level of care I esthetics, function and comfort. We spend countless hours each year in postgraduate continuing education programs to ensure that we are on the cutting edge of dentistry with new techniques and products. I really believe my staff members are the best group of oral health care enthusiasts in the world—and they are friendly too."

WHAT'S MOST REWARDING ABOUT YOUR WORK?

"A career is more than just a job. It should be something you love to do. And the dental profession allows me to surround myself with team members who are supportive of my passion and who also care about people."

HOW DO YOU GIVE BACK TO YOUR COMMUNITY?

"It is very gratifying knowing that my team and I have been able to provide oral care services to the community, representing a spectrum of society. Early in my career, I participated in the Flying Samaritans. We flew to Mexico and provided oral health care to rural communities. Locally through our Dental Society, my team and I were able to examine children's teeth at South Bay elementary schools as part of Dental Health Month program. And more recently, we participated in CDA Cares, which is organized dentistry's effort to reach out to the underserved communities of California. We have been involved with CDA Cares since its inception. My team and I helped treat patients in Modesto (2012) and San Jose (2013), and we plan to help again when it comes to Los Angeles in 2014."
